## CANBERRA'S NON-INVASIVE CARDIAC IMAGING PRACTICE

*Setting new standards in imaging and service*

### Cardiac CT

At the Canberra Specialist Centre in Deakin, we provide state-of-the-art cardiac CT with the Siemens 64 Cardiac Sensation CT. This is used to image not only the cardiac calcium load, an independent variable for IHD, but also coronary arteries, lumen and plaque characterisation, stenosis, post treatment (stents and CABG) results and pathologies.

For appointments, please call  
**(02) 6124 1900**

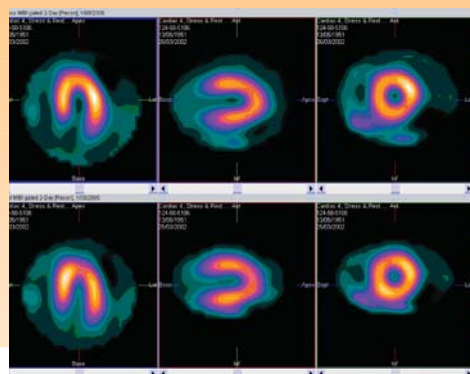

Service provided by  
Dr Robert Greenough and Dr Iain Stewart

### Cardiac Nuclear Medicine

At Derwent House (Civic) cardiac nuclear medicine imaging is providing robust physiological data regarding myocardial perfusion, LV wall motion, LV ejection fraction and myocardial viability. A stress ECG is performed at the same time as part of this MIBI scan.

For appointments, please call  
**(02) 6247 5478**

Service provided by  
Dr Paul Sullivan, Dr Fred Lomas  
and Dr Robert Greenough

### Cardiac MRI

At the Canberra Specialist Centre, Cardiac MRI is provided. This modality is ideal for congenital lesions, cardiac function and post infarct delineation of viable tissue.

For appointments, please call  
**(02) 6124 1900**

Service provided by  
Dr Robert Greenough and Dr Iain Stewart
